betz@msu.edu

Tonight's plan

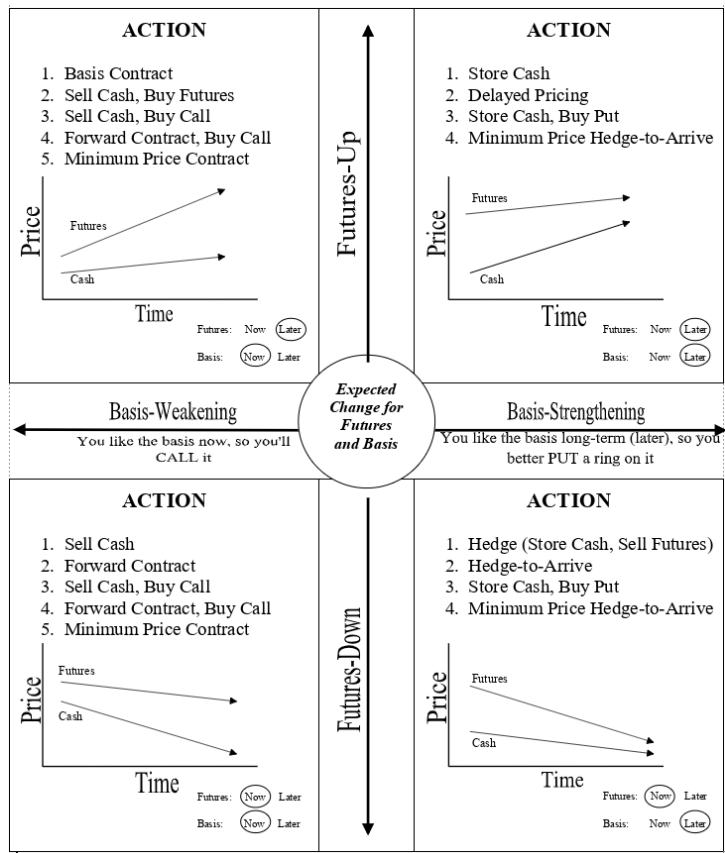

- Pricing decision tool
- When to store cash, buy put
- When to sell cash, buy call
- Guest speakers: Q&A with MAC
- Brief review

Quadrant pricing tool

- Shows which tools should be considered based on market expectations
- Need to form expectations about both futures and basis

Quadrant pricing tool

- Shows which tools should be considered based on market expectations
- Need to form expectations about both futures and basis
- **What if you aren't sure about futures?**

Options intro

- Options provide a "right to buy" or a "right to sell" a futures contract at a specified price.
- **Call option:** gives the holder the right to buy
- **Put option:** gives the holder the right to sell
- **Strike price:** the price at which the option provides the right to buy/sell
- **Option premium:** the market value of the option
 - The price of the "insurance"

What factors affect premiums?

- **Intrinsic value:** positive difference between strike price and underlying commodity price

What factors affect premiums?

- **Intrinsic value:** positive difference between strike price and underlying commodity price

Examples:

- Strike price on put=5.50
- Underlying futures=5.00

What factors affect premiums?

- **Intrinsic value:** positive difference between strike price and underlying commodity price

Examples:

- Strike price on put=5.50
- Underlying futures=5.00
- **Intrinsic value=0.50**

What factors affect premiums?

- **Intrinsic value:** positive difference between strike price and underlying commodity price

Examples:

- Strike price on put=5.50
 - Underlying futures=5.00
 - **Intrinsic value=0.50**
-
- Strike price on **call**=5.50
 - Underlying futures=5.00

What factors affect premiums?

- **Intrinsic value:** positive difference between strike price and underlying commodity price

Examples:

- Strike price on put=5.50
- Underlying futures=5.00
- Intrinsic value=0.50

- Strike price on **call**=5.50
- Underlying futures=5.00
- **Intrinsic value= 0**

What factors affect premiums?

- **Intrinsic value:** positive difference between strike price and underlying commodity price

Examples:

- Strike price on put=5.50
 - Underlying futures=5.00
 - Intrinsic value=0.50

 - Strike price on **call**=5.50
 - Underlying futures=5.00
 - **Intrinsic value= 0**
- **Time value:** portion of the option premium resulting from the length of time to expiration

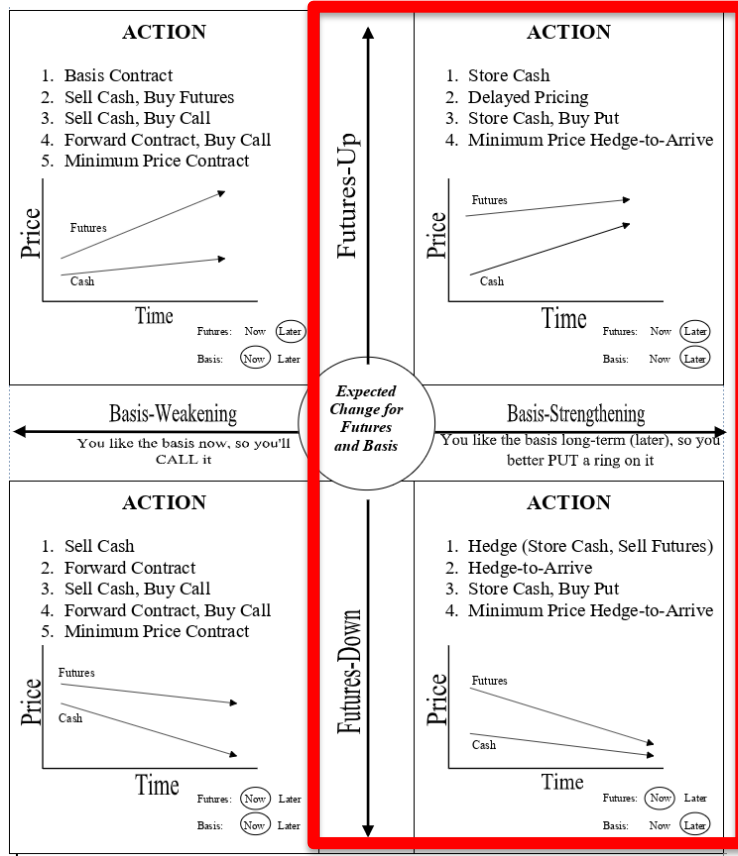

"In the money" vs "out of the money"

- **In-the-money** options have intrinsic value
- **Out-of-the-money** options do not have intrinsic value

Example: Suppose a May futures contract is trading at 5.00

- A \$4 call is in-the-money, a \$4 put is out-of-the-money
- A \$5.05 put is in-the-money, a \$5.05 call is out-of-the-money

Option tools for basis strengthening

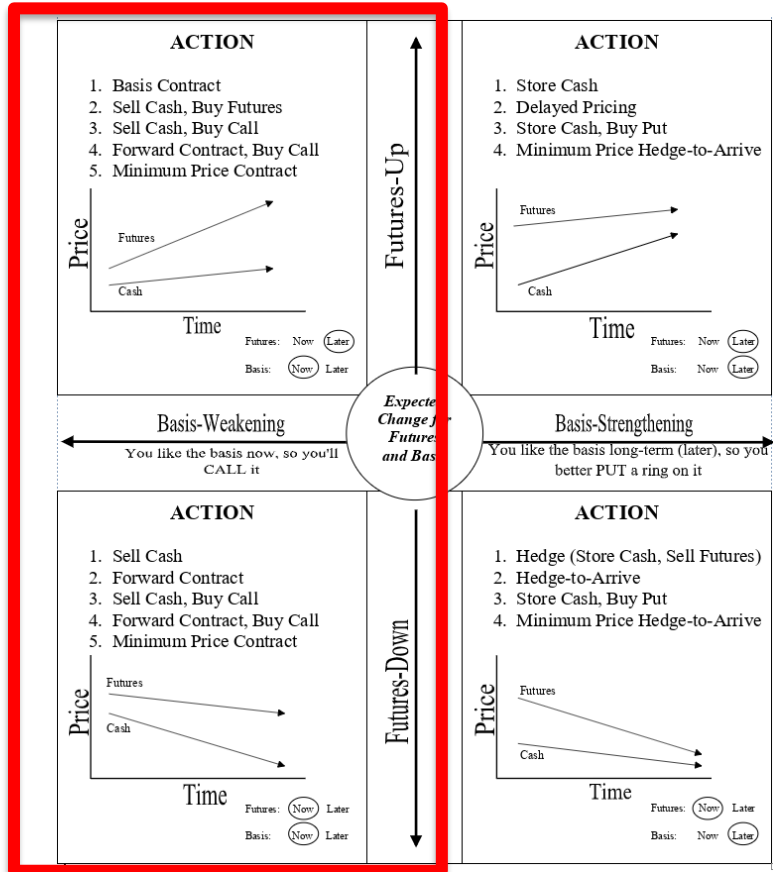

Store cash, buy put:

- Provided you have on-farm storage, you hold grain and wait for improved basis.
- Buying a put protects you against falling futures prices
- Still can benefit from price increases

Chalkboard videos 1 & 2 & 3

Option tools for basis weakening

Sell cash, buy call:

- Sell cash to lock in basis now
- Buy a call to take advantage of potential increases in the futures price
- Protected against price decreases

Chalkboard video 4

Q & A with MAC

Review

$$\text{Cash Price} = \text{Futures Price} + \text{Basis}$$

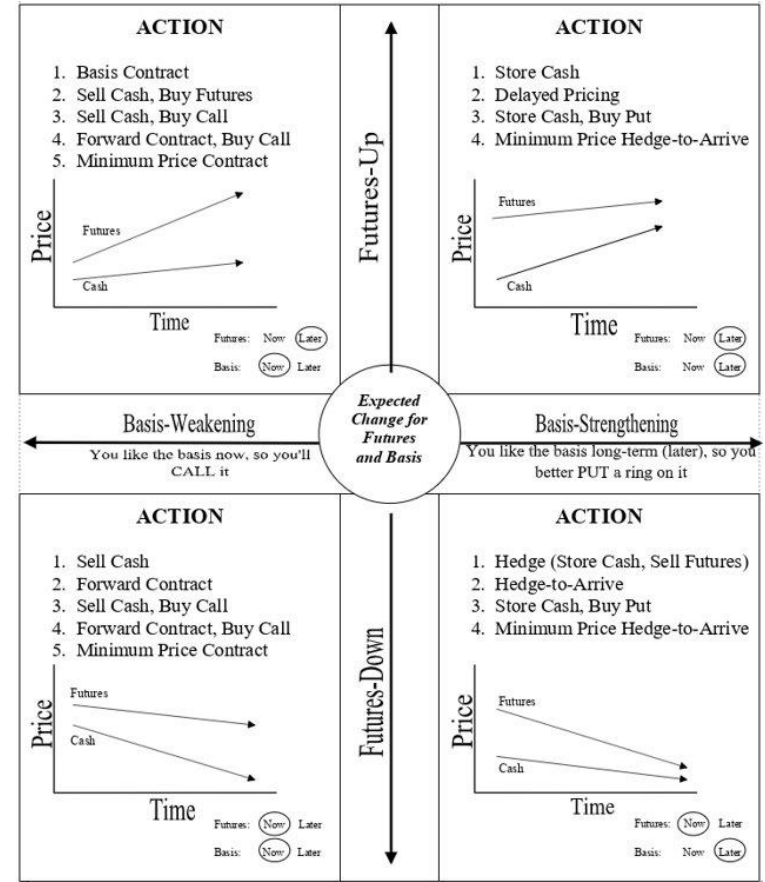

"Your price"
(if you're in the
spot market)

World price

Local supply and
demand factors

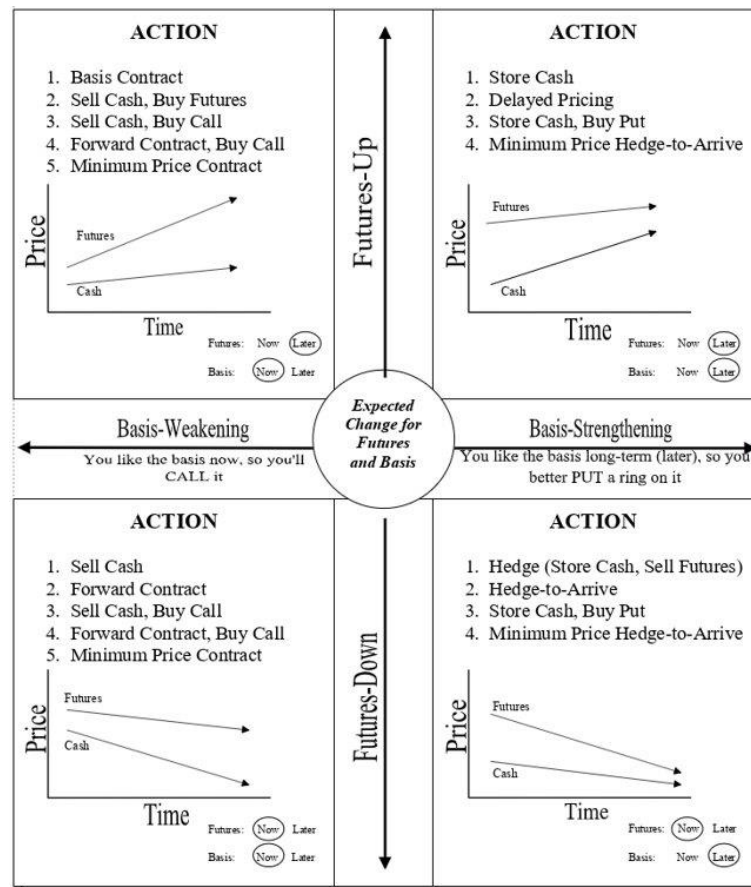

Review

- **Futures prices** are hard to predict
- **Basis** is easier to predict

Review

- **Futures prices** are hard to predict
- **Basis** is easier to predict
- Know when to get out of a hedge with breakeven basis

Other things to think about

- Knowing your cost of production
(<https://www.canr.msu.edu/resources/crop-budget-estimator-tool-detailed>)
- Knowing your time value of money
 - What interest are you paying on your operating loan?
 - What's your storage cost?
- Creating a marketing plan
 - Starts before you plant with forward contracting
 - Have price triggers: "How would my plan change if prices went to \$X?"
- How much risk can you afford?
(<https://www.canr.msu.edu/resources/farm-balance-sheet-template>)

Thank you!

- All videos and slides for this workshop will be available to you
- More questions? E-mail me: gammansm@msu.edu
- Be on the lookout for an intro grain marketing online course through MSU. Will be based on the content in this workshop
